

# SERRAPEPTASE DIETARY SUPPLEMENT

TO RESOLVE:

- PAIN
- INFLAMMATION
- BIOFILM
- FIBRIN
- BLOOD CLOTS
- ATHEROSCLEROTIC
- PLAQUE

## PRODUCT DESCRIPTION

**SERRAPEPTASE** is a strong proteolytic enzyme. The late Hans Nieper, MD, was a German physician that was well known for his use and study of proteolytic enzymes in the treatment of arteriosclerosis. He called **SERRAPEPTASE** the miracle enzyme after using ultrasound to measure its ability to effectively dissolve arterial plaque without harming healthy cells lining the arterial wall. One of the most significant features of **SERRAPEPTASE** (*Helianthus tuberosus*) is that it does not harm any living cells or tissues in the human body; it only dissolves non-living tissue such as cysts, hard and soft arterial plaque, blood clots, etc. The primary purpose of **SERRAPEPTASE** in a protocol for Lyme disease is to dissolve fibrin layers surrounding harmful microbes associated with Lyme disease such as *Borrelia*, *Babesia*, *Bartonella* and *Ehrlichia*. The fibrin layer covering these microbes causes them to be hidden from the immune system; once the fibrin is dissolved the immune system can more easily identify and eliminate the harmful microbes.

## RESEARCH

A study was done to investigate the ability of **SERRAPEPTASE** to reduce postoperative swelling, pain and trismus after third molar surgery. Cheek thickness and maximum interincisal distance were measured using calipers. Pain intensity was assessed clinically using a numeric scale. There was a significant reduction in the extent of cheek swelling and pain intensity in the serrapeptase group.

Al-Khateeb, TH, "Effect of the proteolytic enzyme **SERRAPEPTASE** on swelling, pain and trismus after surgical extraction of mandibular third molars." *Int J Oral Maxillofac Surg*. 2008 Mar;37(3):264-8. doi: 10.1016/j.ijom.2007.11.011. Epub 2008 Feb 12.

Another study was done to assess the response of serratiopeptidase in patients with carpal tunnel syndrome (CTS). Serratiopeptidase therapy may prove to be a useful alternative mode of conservative treatment, based on sixty-five percent of cases showing significant clinical improvement, which was supported by significant improvement in electrophysiological parameters.

Panagariya, A, "A preliminary trial of serratiopeptidase in patients with carpal tunnel syndrome." *J Assoc Physicians India*. 1999 Dec;47(12):1170-2.

## Various Reported Medicinal Properties of Serrapeptase:

- Anti-arthritic
- Anti-bronchitic
- Anti-cariovascular Disease
- Anti-carpal Tunnel Syndrome
- Anti-diabetic
- Anti-hemicrania (Migraines)
- Boosts Immune System
- Anti-microbial
- Anti-osteoporotic
- Anti-sinusitic
- Anti-varicositic

## SUGGESTED DOSAGE

Take 1 to 2 capsules with a full glass of water (8 oz.) up to 3 times daily at least 30 minutes before meals.

**Note:** Do not use if taking blood platelet inhibitors such as Ticlid, Plavix, Coumadin or similar prescription medications.
