

BURBUR DETOX

Burbur Detox is an extract produced from the leaves of *Desmodium molliculum*, a perennial plant that is harvested between 1,000 meters to 3,500 meters above sea level in Peru. Nutramedix utilizes a proprietary extraction and enhancement process that makes this product far more effective than any other *Desmodium molliculum* product available.

Primary Uses of Burbur Detox:

- LIVER DETOX
- LYMPHATIC DETOX
- KIDNEY DETOX
- GROUND MATRIX DETOX
- BLOOD PURIFIER
- ANTI-INFLAMMATORY

The herb in Burbur has been traditionally used for its body cleansing properties. It is very effective in aiding detoxification of the liver, kidneys, lymphatic system and the ground matrix. Burbur is commonly used in conjunction with antimicrobials produced by Nutramedix like Samento, Quina and Cumanda. Many health care professionals have reported that Burbur can be used in place of 5 detoxification remedies. In many cases a significant healing crisis (Herxheimer's reaction) can be dramatically reduced or eliminated with the frequent use of Burbur, approximately every 10 minutes.

There are no known contraindications, no known side effects and no known interactions with other drugs when using *Desmodium molliculum* products like Burbur. In May 2005, toxicology studies were conducted on Nutramedix Burbur at the University of Guayaquil, Ecuador. No toxic effects were reported, even when laboratory rodents received 120,000 times the equivalent human dose.

Some of the reported properties of the herb found in Burbur Detox are:

- ANTIALLERGIC
- ANTIANAPHYLACTIC
- ANTI-ASTHMATIC
- ANTI-INFLAMMATORY
- ANTIMALARIAL
- ANTIMICROBIAL
- ANTIPARASITIC
- ANTISPASMODIC
- ANTITUMOR
- ANTIVIRAL
- CHRONOTROPIC
- DEPURATIVE
- DIGESTIVE
- DIURETIC
- HEPATOPROTECTOR
- IMMUNO-MODULATOR
- INOTROPIC
- SEDATIVE
