

TAKUNA

MICROBIAL DEFENSE

TAKUNA- MICROBIAL DEFENSE is an extract produced from the bark of *Cecropia strigosa*, a tree that is found throughout South America. It has recently been found to have very powerful antiviral properties as well as some other general antimicrobial properties. Nutramedix utilizes a proprietary extraction and enhancement process that makes this product more effective than any other *Cecropia strigosa* product available.

Primary Uses of TAKUNA are:

- ANTIVIRAL
- ANTIBACTERIAL
- ANTIFUNGAL

Practitioners using the product have found that TAKUNA given every hour usually resolves influenzas in just a few hours. In some cases the symptoms are resolved in as little as one hour.

It also appears to be very helpful in improving the condition of patients with viral infections like:

- CHRONIC VIRAL HEPATITIS (SEXUALLY TRANSMITTED)
- HERPES ZOSTER- SHINGLES
- CHRONIC EPSTEIN BARR
- CHRONIC CYTOMEGALOVIRUS
- ACUTE AND CHRONIC VIRAL ENCEPHALITIS AND MENINGITIS

Practitioners also report that TAKUNA is effective against some bacterial infections and some fungal infections.

Researchers in Israel report that they have tested TAKUNA and have found it to be effective against Asian bird flu.
