

ENULA

MICROBIAL DEFENSE

TO RESOLVE:

- BACTERIA INFECTIONS
- PARASITIC INFECTIONS
- LYME DISEASE

PRODUCT DESCRIPTION

ENULA is a proprietary blend of the extracts of two plants: Elecampane (*Inula helenium*), and Jalapa (*Ipomoea purga*). Elecampane contains inulin which helps promote beneficial intestinal bacteria. This is very important since 70% of the immune system is located in the digestive system. Studies have also shown two other active ingredients in elecampane, alantolactone, and isolanolactone, to be useful in treating parasites, including roundworm, hookworm, whipworm, and threadworm; this research supports the traditional use of elecampane to treat digestive disorders and parasitic infections. Many practitioners have noted that **ENULA** is effective against certain species of Babesia, a parasite commonly associated with Borreliosis (Lyme disease).

RESEARCH

In late 2007, researchers at Cork Institute of Technology, in Cork, Ireland reported that [Elecampane] *Inula helenium* kills the potentially fatal methicillin-resistant *Staphylococcus aureus* (MRSA) and methicillin-sensitive *S. aureus* (MSSA). Extracts from two plants were tested against a group of staphylococci including MRSA and Elecampane proved 100% effective against the 200 staphylococci tested.

O'Shea, S, "In vitro activity of *Inula helenium* against clinical *Staphylococcus aureus* strains including MRSA." *Br J Biomed Sci.* 2009;66(4):186-9.

A 1990 study showed that *Ipomoea jalapa* was among the enanolic plant extracts that inhibited growth of *Mycobacterium Tuberculosis*. It has been deemed to be therapeutically useful; having both antituberculosis and other antimicrobial properties.

Grange, JM (1990), "Detection of antituberculous activity in plant extracts." *J Appl Bacteriol.* 1990 Jun;68(6):587-91

PATIENT REPORTS

"Has helped tremendously with my Lyme Disease."

-D.M.

"This is the best defense for my bouts with Lyme Disease. I know the medical industry doesn't want to hear about natural products, but they don't have anything that is as effective!"

-A. M.

SUGGESTED DOSAGE

Put 1 to 30 drops in 4 oz. of water and wait one minute before drinking. Start with 1 drop twice daily, at least 30 minutes before meals, increasing slowly up to 30 drops twice daily.

Various Reported Medicinal Properties of Enula:

- Anti-parasitic
- Antibacterial
- Lyme Disease
- Digestive System Health
