

# EZOV

## EMOTIONAL BALANCE

FOR RESOLVING SUBCONSCIOUS TOXIC EMOTIONS THAT ARE THE ROOT CAUSE OF MANY PHYSICAL SYMPTOMS AND PSYCHOLOGICAL DISORDERS

### PRODUCT DESCRIPTION

**EZOV** is an extract produced from the flowers of *Hyssop officinalis*, commonly known as Hyssop. **EZOV** is primarily used to help the patient resolve subconscious (suppressed) emotions that may affect his/her health. Many healthcare professionals believe that there are 4 major groups of toxins that can contribute to chronic or degenerative disease: 1) microbial biotoxins, 2) heavy metals, 3) other environmental toxins, and 4) emotions. Many doctors also believe that emotions (especially subconscious) cause the patient to more avidly hold on to heavy metals and other toxins. Most of the emotions that affect our health originate before the age of 6 since it is difficult or even impossible for a child to process most traumatic or deep emotional events. Some suppressed emotions can contribute to a medical condition immediately but subconscious emotions can also negatively affect our health many years after the emotions were suppressed. Most practitioners believe that emotions are the most difficult contributor to illness to treat.

### RESEARCH

Immuno-Selective Anti-Inflammatory Derivatives (ImSAIDs), one of which is in hyssop, are a class of peptides that are reported to have anti-inflammatory effects and can attenuate the amplified inflammatory response by limiting the activation and migration of inflammatory cells thus providing neuro-protective strategies for victims exposed to blasts. This protects the CNS (Central Nervous System) from a pressure effect associated with posttraumatic stress disorder and reactive depression.

Chen, Y, "Concepts and Strategies for Clinical Management of Blast-Induced Traumatic Brain Injury and Posttraumatic Stress Disorder," *J Neuropsychiatry Clin Neurosci.* 2013 Spring; 25(2):103-10. <http://dx.doi.org/10.1176/appi.neuropsych.12030058>

### PATIENT REPORTS

"**EZOV** gave my daughter a second chance. She suffered childhood trauma and has had times when they resurfaced. Therapy didn't work, but with **EZOV**, she's been blessed to return to college to complete her degree in child psychology."

-R.O.

### SUGGESTED DOSAGE

Put 1 to 8 drops in 4 oz. of water and wait one minute before drinking. Start with 1 drop daily just before bedtime. Add one drop per dose every three days until reaching 8 drops per night (for a small adult) by day 22 or 10 drops (for a larger adult) by day 28. Take for at least two months at full dosage. If not able to sleep well, reduce the dosage and/or the rate of build-up.

### Various Reported Medicinal Properties of Ezov:

- Antispasmodic •
- Antiviral •
- Carminative •
- Diaphoretic •
- Expectorant •
- Reduces Phlegm •
- Relaxes Peripheral Blood Vessels •
- Resolves Emotions •
- Sudorific •
- Topical Anti-inflammatory •
