

MORA MICROBIAL DEFENSE

MORA MICROBIAL DEFENSE is a proprietary blend of the extracts of three plants- Yarrow, Mulateiro and Blackberry. Nutramedix utilizes a proprietary extraction and enhancement process that yields a highly bio-active product.

Primary Uses of MORA MICROBIAL DEFENSE:

- ANTI-PARASITIC
- ANTI-BACTERIAL
- ANTI-FUNGAL
- LYME DISEASE

Traditionally, Yarrow has been used to treat a number of medical conditions. It was used to help stop minor bleeding and to treat wounds, to treat inflammation in a number of conditions, fight fevers, treat gastrointestinal conditions, lessen heavy menstrual bleeding, and improve circulation. Some of the compounds found in Yarrow that may explain its medicinal benefits are apigenin, luteolin, centaureidin, casticin, artemetin, paulitin, isopaulitin, psilostachyin, desacetylmaticarin and sintenin.

A study published in December 2008 states that centaureidin, a compound found in Yarrow, has a significant anti-cancer effect. The anti-proliferative assay demonstrated that centaureidin is the most effective constituent of the aerial parts of yarrow.

A group of researchers from India published a study in September 2008 reporting on the anti-helminthic (intestinal worm anti-parasitic) activity of Yarrow. The in vitro study revealed a very significant effect-killing 94.4% of intestinal worms. The in vivo (sheep) portion of the study reported an 88.4% reduction in nematode egg count. The results from this study appear to support reports from physicians regarding the beneficial effects of Mora in the treatment of parasites such as Babesia that are commonly found in patients suffering from Lyme disease (Borreliosis).

These are some of the medicinal benefits of Yarrow confirmed by studies published since 2000:

- ANTI-NOCICEPTIVE EFFECT (increases tolerance for pain)
- ANTI-MOTILITY EFFECT
- ESTROGENIC ACTIVITY
- CHOLERETIC EFFECT
- ANTI-OXIDANT ACTIVITY
- CYTOPROTECTIVE
